

## **KEY-KOMPRESS** case study

---

PROJECT: CSR Trinitii HQ

BUILDER: FDC Constructions

PRODUCT: KEY-KOMPRESS Slotted

SPECIFICATION:

KS3 30/90/90B Custom slot panels

- BareStone 9mm Compressed Fibre
- Pre-finished panel
- Raw cement look

AWARD: 5 Star Green Star

*“CSR’s Trinitii Project was awarded a 5 Star Green Star - Office Interiors v1.1 rating for the fitout of its new offices located in the Trinitii III building in the Stockland Trinitii campus at North Ryde.”*

Keystone Acoustics wall and balustrade panels can be used in innovative ways to transform a conventional safety barrier into a creative and stand-out feature.

Keystone’s slotted balustrade panels were recently installed in the Trinitii Building.

Keystone continues to work closely with CSR in a number of areas and were please to be invited to join the design team in designing special features in their own office fit-out.

*KEY-KOMPRESS is particularly effective in building facades and commercial cladding applications. It is strong and has a smooth surface which can be pre-sealed to minimize painting time.*
