

KEY-KOMPRESS

compressed fibre cement

Product description

Made from high density compressed fibre cement perforated to achieve excellent acoustic insulation, KEY-KOMPRESS is particularly effective in building facades and commercial cladding applications. It is strong and has a smooth surface which can be pre-sealed to minimize construction and painting time. KEY-KOMPRESS can be used with KA100 backing to maximise acoustic insulation.

Applications

- internal walls
- exterior building facades
- eaves linings
- industrial buildings and warehouses
- schools and universities
- buildings in close proximity to salt water, swimming and leisure centres
- clubs – outdoor terraces, exterior partitions, smokers'/gaming areas

Features and benefits

- impact resistant
- robust and long lasting
- weather resistant
- can withstand extreme temperature changes
- unaffected by rot, termites or salt water
- ideal for wet area applications
- excellent acoustic properties
- Australian-made

Finishes and options

- undercoat option available (on-site painting by others after installation is recommended)
- plain or shaped panels
- cut-to-size panels
- tiles
- eaves lining
