

KEY-DESIGNA

custom engineered

KEY-DESIGNA panels are one-of-a-kind solutions, custom engineered and specially manufactured for specific design criteria.

Keystone Acoustics will work with you to devise a precise solution tailored for your needs. This may include combining a range of materials, shaping and grooving techniques, perforated lettering for internal signage, decorative patterning and more.

Applications

- feature walls
- any internal walls
- clubs and hotels
- schools
- office refurbishments

Features and benefits

- endless design possibilities
- fully customised to your aesthetic and acoustic requirements

Finishes and options

- 3D modular shapes
